

## PTNA / PTNB DTNA / DTNB

## MULTITIMER

Difference	Multifunction - Multivoltage
Operating principle	Twelve functions selectable by rotary switch (see detailed description of each function on page 2):
	<ul> <li>A - Delay on operate</li> <li>B - Interval on operate</li> <li>I - Simetrical recycler starting by off</li> <li>J - Simetrical recycler starting by on</li> <li>A - Delay on operate with time storage, without memory</li> <li>C - Delay on operate by external input, when activate</li> <li>E - Delay on operate by external input, when deactivate</li> <li>G - Delay on operate by external input, when activate or deactivate</li> </ul>
	B - Interval on operate with time storage, without memory D - Interval on operate by external input, when activate
	F - Interval on operate by external input, when activate or deactivate
Leds indications	H - Interval on operate by external input, when activate or deactivate  Power on: Green
	Relay on: Red
Repeating precision	± 1%
Precision	± 2%
Reset	By disconnecting the supply for longer than 60 ms
Sensor type	NPN 10 mA / 24 VDC

	HOUSING		FUNCTION		OUTPUT	SUPPLY			RANG	Ę
ω,	Plug-in DIN rail	TN	Multitimer	A B	SPDT DPDT	U24 724 024 110 230 400 901 902	24 VAC/DC 24 VDC 24 VAC 110125 VAC 220240 VAC 380415 VAC 1570 VAC/DC 60240 VAC/DC	192	0,11 S 0,33 S 1,515 S 330 S 660 S 18180 S 1,515 M 330 M Selection b	660 M 18180 M 0,66 H 2,424 H 4,848 H 9,696 H 19,2192 H

To compose the reference, select one option of each column. Example: PTNA U24 192

## **FUNCTIONS AND DIAGRAMS**

	DELAY ON OPERATE			
J_ A _B	When the supply voltage is connected, the relay remains released and the time circuit starts	ф <u></u>	_	
	up. After the pre-set time the relay operates. It remains in the condition an indefinite time.			
G. F. F		<u> </u>	<b>-</b>	<u>←T</u> —
	INTERVAL ON OPERATE

	SYMMETRICAL RECYCLER OFF/ON			
. ч А з	When the supply voltage is connected the time circuit starts up. After the pre-set time, the			
H <sub>S</sub> E	relay operates and stays on for the same period of time as the pre-set one. The cycle repeats itself non-stop.	<ul><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li><li>□</li>&lt;</ul>	<b>→</b> □	 
	SYMMETRICAL RECYCLER ON/OFF			
J^===	When the supply voltage is connected the relay operates inmediately and the time circuits			
H-S-E	starts up. After the pre-set time, the relay releases and stays in this state for the same period of time as the pre-set one. The cycle repeats itself non-stop.	P	1	<u>- T -                                 </u>
	DELAY ON, WITH TIME STORAGE, WITHOUT MEMORY			
J_ A _B	When the supply voltage is connected, the relay remains released and the time circuit is start up. If the external input is activated, the time circuit stops. When the external input is	中一		
	deactivated, the time circuits follows on. After the pre-ser time, the relay operates and	<del>-</del>		
	remains so for an indefinite period of time. By desconnecting the suply voltage, the reset of the time and relay and relay is brought about.	<u> </u>	<b>→</b> □	(T= T1 + T2 ) 
	INTERVAL ON WITH TIME STORAGE WITHOUT MEMORY			
J- <u>A</u> ,−B	INTERVAL ON, WITH TIME STORAGE, WITHOUT MEMORY  When the supply voltage is connected, the relay operates inmediately and the time circuit	4 =		
	starts up. If the external input is activated, the time circuit stops. When the external input is	中 上		
G F L	deactivated, the time circuit follows on. After the pre-set time, the relay releases and remains so for an indefinite period of time. By desconnecting the supply voltage, the reset		<b>→</b>	4Tin
	of the time and the relay is brought about.	<b>/-</b> □		(T = T1 + T2)
	DELAY ON OPERATE, BY EXTERNAL INPUT			
J_A_B_C	Timing while the input is activated			
G F E	When the supply voltage is connected and the external input is not activated, this has no effect on the system. When the external input is activated, the relay remains released and the	中一		
	time circuit starts up. After the pre-set time the relay operates. If while time is running, the	<del>~</del>		
	input is activated and deactivated for a shorter period than the pre-set time, the relay remains released.			<u></u>
J- A-3	Timing when the input is deactivated			
e F E	When de supply voltage is activated the time circuit starts up. After the pre-set time the relay operates and remains so until the input is activated or the supply voltage is	ф <u> </u>		
	disconnected. When the input is activated, the relay rermains released. When the	쓱		
	input is deactivated, the time circuit is starts up. If while time is running the external input is activated and deacitivated, the rest of the time is brought about and the relay	<u></u>	<b>⊺→</b>	<del>-</del> -T→    <del>-</del> -T→
	remains released.			
A 3 -c	Timing when the input is activated or deactivated			
G-	When de supply voltage is activated the time circuit starts up. After the pre-set time the relay operates. When the input is activated, the relay rermains released and the	₽ □		
	time circuit starts up. After the pre-set time the relay operates. When the input is	- <u>-</u>		
	deactivated, the relay releases and the time circuit starts up again. After the pre-set time, the relay operates. The succession of input pulses with a cadence less and the			  -T-    -T-
	pre-set time bring about the reset of the time and the relay	<i></i>		p—1—4 p—1—4
	INTERVAL ON OPERATE, BY EXTERNAL INPUT			
J 4B	Timing while the input is activated			
H= D	When the supply voltage is connected and the external input is deactivated, this has no			
G F	effect on the system. When the external input is activated, the relay operates inmeditely and	ф <u> </u>		
	the time circuit starts up. After the pre-set time, the relay releases and remains so until the external input is deactivated. If while time is running, the input is activated and deactivated	⊹		
	for a shorter period than the pre-set time, the relay remains operated.	<i>-</i>		
J_ A _3	Timing when the input is deactivated			
F C	When the supply voltage is activated the relay operates immediately. After the pre-set			
F	time the relay releases and remains so. When the input is activated, the relay operates immediately and when the input is deactiveted, the time circuit starts up. After the pre-set	\$ _□		
	time the relay releases and remains so until the input is again activated. If while time is	÷	- 1	
	running the external input is activated and deactivated for a shorter time than the pre-set one, the relay remains operated.	<b>∠</b> <u>Ľ</u>		
~ <u>A</u> _3	Timing when the input is activated or deactivated			
H D	Timing when the input is activated or deactivated  When the supply voltage is activated the relay operates immediately. After the pre-set			
G F TE	time the relay releases and remains so. When the input is activated, the relay operates	ф <u></u>		
	immediately and when the input is deactiveted, the time circuit starts up. After the preset time the relay releases. When the input is deactivated, the relay operates immediately	♣		
	and the time circuit starts up. After the pre-set time the relay releases. The succession of input pulses with a cadence less than the pre- set time bring about the reset of the time	<u> </u>		<u> </u>
	and the relay.
